

intimus FlashEx

FLASH MEDIA SHREDDER FOR OFFICE USE

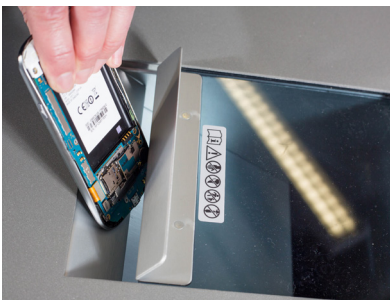

ON-SITE DESTRUCTION OF ELECTRONIC AND OPTICAL MEDIA

The intimus FlashEx features a robust cutting head with unique, claw-like cutting cylinders that seize and draw the material into the machine. The device processes media such as SSDs, smartphones, tablets and USBs. It is equipped with an automatic reverse function for thicker materials, ensuring complete destruction down to particles of 4 x 15mm.

Safety is a key aspect of its design, including a safety feed slot that protects users while allowing them to view the shredding process. The i-control system ensures the machine is straightforward to operate, giving full control to the user.

The intimus FlashEx stands out as the only immediate, secure method to eliminate sensitive multimedia and digital data on-site, eliminating the risks associated with storing such items for off-site destruction and significantly reducing the chance of data theft.

Effective destruction of smartphones and tablets (without batteries)

SSDs, USB sticks, SD cards, and plastic cards are rendered unusable

Small magnetic tapes, as well as CDs, DVDs and Blu-rays are shredded

Specifications

Specifications

Security level*	E-3 T-4 ⁴ O-3
Cutting type	Cross cut
Cutting size media	4 x 15 mm
Shredding material	SSD, Smartphones (without battery), Tablet (without battery), USB stick, CD / DVD / Blu-ray, Floppy disk, Plastic card, SD card
Working width	165 mm
Throughput	SSD: up to 1.090 units/h USB: up to 500 units/h Smartphone: up to 100 units/h CD: up to 1.500 units/h Floppy disk: up to 1.000 units/h
Noise level	65 dB(A)**
Bin volume	25 litres

Motor power	1.100 watts
Power supply	230 V / 50 Hz
Net dimensions WxDxH	58 x 61 x 98 cm
Net weight	116 kg
Automatic start/stop	<input checked="" type="checkbox"/>
Automatic reverse	<input checked="" type="checkbox"/>
Bin full sensor	<input checked="" type="checkbox"/>
Continuous Running	<input checked="" type="checkbox"/>
Castors	<input checked="" type="checkbox"/>
Made in Germany	<input checked="" type="checkbox"/>

* Security level according to DIN 66399 (ISO/IEC 21964).
 ** Noise level in idle operation.
 4 Except from magnetic tape cassette with metal core.

All data without liability. Subject to technical and optical changes.
